

TECHNICAL SHEET
Scapin, the gardener
Show duration: 35 minutes

We will bring all the necessary material for the set and the props. It will fit in bags weighing **maximum 23 kg and measuring 158 cm (75 H + 50 L + 30 l= 91L).**

STAGE SIZE: Flat basement needed:

Opening: 4 m minimum
Depth: 3m minimum
Height: 2.70m minimum

HOME TEAM:

1 actor
1 stage lights - except if playing outside with natural light.
Bottle of mineral water

There is no time for setting up and dismantling: François (as a gardener-clown character) comes on stage with 2 suitcases containing puppets and sound system! A real one-man show, highly mobile, and can be presented indoors and outdoors!

For an audience of more than 200 people, as the puppets measure between 40 and 70 cm high, live video transmission onto one, or more, giant screens is required and sound system.

The essential point is for the spectator to have perfect sound reception; for this we request (when outdoors) a courtyard (cut off from any disturbing surrounding sound), a closed garden, the front of a building (castle, high fence, etc).

The audience should be seated.
